

„VaKE and beyond 2“

Symposium

July, 4 – 6, 2016

University of Salzburg, Dept. of Education, Erzabt-Klotz-Straße 1, 5020 Salzburg, Austria

VaKE (Values *and* Knowledge Education) is a constructivist teaching approach that consists in using a dilemma in the Kohlberg tradition to trigger inquiry-based learning of content. Research done during more than 15 years has shown broad evidence for its applicability in teacher training, civic and democratic education, school education, health care, sustainability education, intercultural education, etc.

In 2015 the first symposium “VaKE and beyond” made evident the need of continued discussions on issues related to the theoretical foundations and the practical application of VaKE in diverse fields of education and training.

The symposium “VaKE and beyond 2” will respond to the growing interest in exchanging experiences, in creating concepts of new VaKE-projects, and in strengthening the network between researchers and professional practitioners.

We invite you to share your interest, your ideas and projects, and your critics on VaKE, and to contribute to its development.

The symposium provides the following formats for contributions:

- Round Table
- World Café
- Discussion Group
- Poster Gallery

Please send a short description of your contribution to: vakeandbeyond@sbg.ac.at

The short description should have:

Title,

Format:

Name of author and organization:

Abstract (300 words):

We invite you also to become a member of the AVaKE-network: <http://www.vake.eu>

Organisation:

Mag. Dr. Sieglinde Weyringer
